Subject: Logistics Partnership Inquiry / RFP - Luna Cosmetics (US Warehousing + Last Mile)
Date: October 15, 2026

Hi Miguel and TrackFlow Commercial Team,

We are Luna Cosmetics, a direct-to-consumer beauty and skincare brand based in Los Angeles, United States (Country: USA). We are scaling rapidly across the US market and would like to request a formal proposal (in USD) to outsource our fulfillment starting next month.

Here are the key details of what we need from TrackFlow:
- Client Name: Luna Cosmetics
- Client Country: USA (Los Angeles operation, currency USD)
- Services Requested: Warehousing (storage & pick/pack) + Last Mile delivery across the USA.
- Note on Returns: We do NOT need reverse logistics / returns processing from TrackFlow because opened cosmetic products cannot be restocked and we handle customer refunds directly through our internal support team without physical return shipping.
- Estimated Monthly Volume: ~5,000 pedidos/mes (5,000 orders/month).
- Proposal Deadline: 2026-11-15
- Target Budget Range: 25,000 USD - 32,000 USD per month

Warehouse Operations Requirements (Los Angeles):
We have 220 active cosmetic SKUs (serums, creams, and gift kits) requiring lot/expiry tracking and approximately 120 pallets of storage space in your Los Angeles facility. Please share your storage cost per pallet and per SKU, onboarding timeline, and volume discount tiers.

Last Mile & Carrier Management Requirements (US Domestic):
We ship approximately 5,000 B2C parcels per month across California (60%) and the rest of the continental United States (40%), average weight 0.8 lbs per parcel. Please provide your final shipping cost per order, available carriers by destination zone, and the on-time delivery SLA (%) that TrackFlow commits to achieving.

Looking forward to your proposal!
Best regards,
Elena Vance — VP of Supply Chain, Luna Cosmetics (Los Angeles, USA)
